ABOUT

I am a 4th-year student interested in Android (native) development and have been learning and developing since 2021 using Java and Kotlin.

I have also solved more than 1000 problems at different online judges, specifically at CodeForces and LeetCode.

I have done many projects, like class management, house rental, whiteboard, video player, shape detection without AI, screen sharing, and a few small projects.

EDUCATION

Higher Secondary School Certificate

New Govt. Degree College

2017 - 2019

BSC in Computer Science and Engineering

Khulna University of Engineering & Technology

2019 - Present

SKILLS

Java

Kotlin

Android App development

OOP

Problem Solving

C++

C

Swift

Firebase

MVVM

PROJECTS

ClassMate

2020 - Present Location

An android app where users can create a class and manage it in an organized way with their classmates.

- Written in Java and Kotlin.
- <https://play.google.com/store/apps/details?id=com.unknownn.classmate>

WhiteBoard

2022 - 2023 Location

An Android app where a user can draw like a whiteboard and is capable of detecting a few user-drawn shapes.

- Written in Java.
- <https://play.google.com/store/apps/details?id=com.unknownn.smartboard>

ACHIEVEMENTS

3 apps are published in play store

All are written in Java and Kotlin
